Returns to the CZU

On December 1, 2025, the Czech University of Life Sciences (CZU) launched a call for applications for Return Grants. The call is implemented within the project “Returns to CZU,” registration number CZ.02.01.01/00/24_037/0013835, supported by the Operational Programme Johannes Amos Comenius.

For who is the Return Grant?

The eligible applicant (main researcher) for the Return Grant is a researcher returning to active work in research and development (R&D) after a career break, or for whom no more than 12 months have passed since his/her return at the time of submitting the Return Grant application.

What is a career break?

A career break is a period of at least 180 consecutive calendar days during which the researcher (the applicant for the Return Grant) was unable to carry out research and development (R&D) activities in full due to maternity or parental leave, long-term care responsibilities, or long-term illness. The career break may be interrupted for periods when the personal obstacle temporarily ceased. It is permitted for the researcher to perform R&D activities during the career break under an employment relationship with the beneficiary, up to 0.3 FTE per month on average, calculated over the number of months during which such work was carried out. However, in no individual month may the researcher's R&D engagement during the career break exceed 0.5 FTE.

What can I gain through the Return Grant?

- Funding for your own research in the form of a main researcher position at 0.5–1.0 FTE
- Collaboration with a mentor at 0.2 FTE (especially if the main researcher is a junior researcher or PhD student)
- Support expert team (optional, up to 4 people with a total workload of max. 2.0 FTE)
- Mobility of the main researcher (optional, for 1–6 months)
- Further education of the main researcher
- Contribution for the care of a child or close person

Employees of CZU can also use the extended capacity of the university childcare group **Poníček**, which provides care for children from 2 years of age.
